Custom Ordering Tips-

Measure the area where you want the vinyl to be, keeping in mind borders.

For example, if you are putting your vinyl on a 12x12 inch tile you may want a small boarder on all sides of your tile plus extra on the bottom for an easel that may cover part of the tile or maybe you want to put a ribbon or other embellishment on it.

Measurements go from the top of the tallest letter to the bottom of the lowest letter. You will pay for the finished size of your order.

For example, refer to the image below. The "Cherish - Live - Dream" is 7 inches tall and the "yesterday today tomorrow" are 2 inches tall. Because we are going to measure the finished size, from the top of the "D" to the bottom of the "y" it is only 8 inches tall. So this would be the 8x24" size.

Notice that our length sizes are in 6 inch increments. To insure your satisfaction we send custom orders for approval via email before we fulfill the order.
